

KeyTec China Painting Capability

# Our Company

- Established WOFE in 2000
- Total investment 18M\$
- Fully equipped Toolshop
- Metal & Plastic & Decoration
- Components & Full Assembly
- 27000m2 floor space
- ISO 14001 certified (2002)
- IATF 16949 certified (2004)
- ISO 13485 certified (2012)
- 26.6 M USD Sales (2020)

# Worldwide production

## 1. Netherlands

Eindhoven headquarters

Sittard

Proto & Mass production  
Metal, Plastic and Assembly

## 2. Czech Rep.

Ceske Budejovice

Metal, Painting and Assembly

## 3. China

Suzhou PC

Metal, Plastic, Painting, Decoration  
Assembly and Tooling

Suzhou MM

Hongkong Rep. office

## Our customers KeyTec Inside

- Multinational
- Worldwide focus
- Pro active
- Zero-defect Quality

**“Powerful in Metal-Plastic combinations”**

**Honeywell** **BT** 

**PHILIPS**

**Audi**

**CHRYSLER**

**mazda**

**SIEMENS**

**CHEVROLET**

**SENSIRION**  
THE SENSOR COMPANY

## Our customers KeyTec Inside

PRECISION COMPONENTS

# KeyTec Capacities

# KeyTec Stamping

- Floor Space: 1600m<sup>2</sup>
- Presses: 14 (Kaiser, Seyi, Micron)
- Tonnage: 25T-400T
- High Speed (800SPM)
- Deep Drawing
- Deburring & Cleaning
- Ultra Sonic Cleaning
- Auto Bending & Assy

# KeyTec Precision Molding

- **Machines: 44 (Arburg, Demag, Engel)**
- **Insert Molding (Metal + Plastic)**
- **2K (2shot) Molding**
- **High Speed Molding**
- **Rapid Heating and Rapid Cooling**
- **Clean Room Molding**
- **Electric Molding**
- **Tonnage: 15-650T**
- **Floor Space: 2500m<sup>2</sup>**

# KeyTec Surface decoration

- Laser Etching
- Silk screen Printing
- Pad (tampon) Printing
- Painting
- Plating (outsourced to partner)

# KeyTec Painting

- **Floor Space: 1000m<sup>2</sup>**
- **1 Water-based Robot Painting Line**
- **CO<sub>2</sub> Snow and Ionized Cleaning**
- **Plasma Surface Activation**

# “Japan YASKAWA explosion-proofing painting robot”

## Technologies

- Japan YASKAWA explosion-proofing painting robot
- 2-layer painting, wet to wet, one curing process
- Automotive interior decorative panel, Painting area: 600\*600mm

# “GRACO 2K ProMix 2KS

## Two Component Electronic Proportioning System

### Technologies

- Functions controlled By PLC
- Automatic run mode: Gun trigger detected by Electronic input
- Gun with integrated flow control capability

**Main operator interface**

System  
Setup and  
run  
process  
Monitoring

Independent  
Keypad

# “GRACO 2K ProMix 2KS - Wall Fluid Panel”

## Technologies

- Dispense , integrate, mix, and flush materials
- Intrinsically safe design

# “GRACO 2K automatic paint supply system”

## Technologies

- Exchange the system between water base paint and solvent paint per the robot
- Automatic cleaning system, mixing accuracy is 1%, and the mixing rate is 1:5~21:1
- Easy to set up and operate
- Extremely fast and step changes and precise closed loop control
- Provides high finish quality and superior material saving.

# “Clean room & Air shower”

## Technologies

- Paint shop cleanness: Class 100K
- Paint booth cleanness: Class 10K
- Air conditioning system with humidity and temperature controlled in paint booth

# “Icetek blasting for Pro-cleaning”

## Technologies

The icetek combines several units and functions:

- A dry ice blasting unit
- Optional Integration in control units and automation processes
- Optional distribution system to facilitate the connector
- Fully Automated Machine for Dry ice Blasting
- Noise level below 75db

# “Chain line”

## Technologies

- Servo Motor driven conveyor system with NC
- Automatic Ionized air blow off to clean the parts and prevent the parts from the secondary pollution on the plastic parts

# KeyTec Internal test capabilities

Professional test methods and specification

- Color and gloss measured by professional instrument
- Hardness test
- Adhesion and cross-cut test
- Coating thickness test
- Resistance against cosmetics test
- Climate test
- Other testing requirements to be discussed depending on specification and professional methods

# “Tunnel Oven”

## Technologies

- 40 ~ 100°C IR Electronic Heating oven, Temperature: 40 ~ 100°C
- 40meter conveyor system, 20-40min baking time
- 10-step separate temperature control, the control accuracy is 5 degree
- UV solidifying system

# “Painting exhaust air treatment system - Zero emission”

## Technologies

- The air treated by the system meeting the requirement of GB 16297-1996
- Comply with EU standards

# “Application: BMW Display”

## Technologies

- Water based printing
- Front and Rear Cover Integrated

**“We Industrialize Your Idea”**

**[www.keytecgroupp.com](http://www.keytecgroupp.com)**

The KeyTec Precision Components logo is overlaid on a photograph of a factory interior. The factory scene shows industrial machinery, including a large vertical structure with a control panel and various tools and equipment on a workbench. The entire image is tinted with a light purple color.
